Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7,9-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Ekkert et al. 5,435,467.

Ekkert et al. disclose a fitment (30), which comprises a circumscribing wall (70), a floor (64) extending inwardly from the wall, a pour spout (50) ascending from an inward portion of the floor, the circumscribing wall has an upper edge (79) that defines a circumscribing wall opening having a given area as seen in Figure 2, one rib (110) which extends in an outward taper from an exterior wall of the pour spout towards the circumscribing wall as seen in Figure 8, the pour spout has a top edge (58) that defines a pour spout opening (52) having a given area as seen in Figures 2 and 6, a ratio of the pour spout area to the circumscribing wall area is greater than about 0.20 as seen in Figure 2, where the ratio of the pour spout area to the circumscribing wall area is greater than about 0.25, 0.30 and 0.35 as seen in Figure 2, a flange (78), a slot (66), an alignment rib (108) extending from the exterior wall of the pour spout outwardly towards the circumscribing wall functioning to align the fitment when multiple similar fitments are stacked during an assembly process (col. 7, 58-68 onto col. 8, ll. 1-3).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ekkert et al. 5,435,467 in view of Klima et al. 6,375,041.

Ekkert et al. have taught all the features of the claimed invention except that a viscous gel is being dispensed. Klima et al. teach the use of a viscous gel within a container (12) (col. 8, ll. 3-7).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the product of Haffner et al. with the viscous gel product of Klima et al., as taught in (col. 8, ll. 3-7), in order to provide a laundry detergent that has a more viscous solution.

Response to Arguments

5. Applicant's arguments filed 2/3/2005 have been fully considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
